## Team Details

- a. Team name : Team Ishnovation
- b. Team leader name : **Ishita Koradia**

## Problem Statement

Women seeking career advancement face challenges in accessing personalized guidance, mentorship, and job opportunities. The current digital landscape lacks an integrated AI solution that can provide real-time career assistance, personalized learning paths, and community connections specifically designed for women professionals. This project addresses this gap through a conversational AI assistant tailored to empower women in their professional journeys.

**CHALLENGE:** Women face limited access to personalized guidance, mentorship, and job opportunities in their career advancement journeys

**GAP:** The current digital landscape lacks integrated AI solutions specifically designed for women professionals

**SOLUTION:** A conversational AI assistant tailored to support women's professional development needs.

**FEATURES:** Real-time career assistance, personalized learning paths, and community connections specifically for women professionals

*“HerKey Saarthi: The master key that unlocks doors you didn't even know were closed to you.”*

## Limited Personalised Recommendation

- Few dedicated tools address the unique challenges women face in career transitions

## Confidence Gap

- Women returners frequently struggle with confidence in their professional abilities

## Potential Problems Faced

## Career Gaps

- Women often face significant challenges when returning to work after career breaks

## Skill Obsolescence

- Rapid technological changes make it difficult to stay relevant after time away

*“HerKey Saarthi: The master key that unlocks doors you didn't even know were closed to you.”*

## Brief about the idea

### Core Concept

- **AI-Powered Career Companion:** An intelligent chatbot designed specifically for women seeking professional development and career advancement.
- **Personalized Guidance:** Tailored advice and resources based on individual career goals, skills, and interests.
- **Continuous Support:** Accompanies users throughout their professional journey with contextual assistance.

*“HerKey Saarthi: The master key that unlocks doors you didn't even know were closed to you.”*

## Brief about the idea

### Key Differentiators

- **Women-Centric Approach:** Built from the ground up with women's career challenges and opportunities in mind.
- **Holistic Development:** Addresses multiple facets of career growth including job search, mentorship, and skill development.
- **Actionable Insights:** Provides clear next steps and practical resources rather than general advice.
- **Scalable Impact:** Leverages AI to provide personalized support to thousands of women simultaneously

*“HerKey Saarthi: The master key that unlocks doors you didn't even know were closed to you.”*

## Brief about the idea

### Technical Innovation

- **Advanced NLU:** Utilizes natural language understanding to interpret career queries with high accuracy.
- **Contextual Awareness:** Maintains conversation history to provide relevant and connected responses.
- **Multi-Modal Integration:** Combines conversational UI with rich content delivery (links, resources, job listings).
- **Data-Driven Enhancement:** Learns from interactions to continually improve response quality and relevance.

*“HerKey Saarthi: The master key that unlocks doors you didn't even know were closed to you.”*

## Brief about the idea

### Market Positioning

- **Gap Filler:** Addresses the lack of accessible, personalized career guidance for women professionals.
- **Inclusion Driver:** Democratizes career guidance that was previously available only through expensive coaching.
- **Success Accelerator:** Serves as a catalyst for women's professional advancement through informed decision-making.

*“HerKey Saarthi: The master key that unlocks doors you didn't even know were closed to you.”*

## Opportunities

### How different is it from any of the other existing ideas?

- Niche focus specifically addressing women's professional development needs and challenges
- Deep integration with JobsForHer's ecosystem rather than functioning as a standalone assistant
- Context-aware conversation that maintains history for coherent guidance
- Community-powered approach leveraging collective wisdom of women professionals
- Growth-oriented focus on long-term career development not just for getting a job.

## Opportunities

### How will it be able to solve the problem?

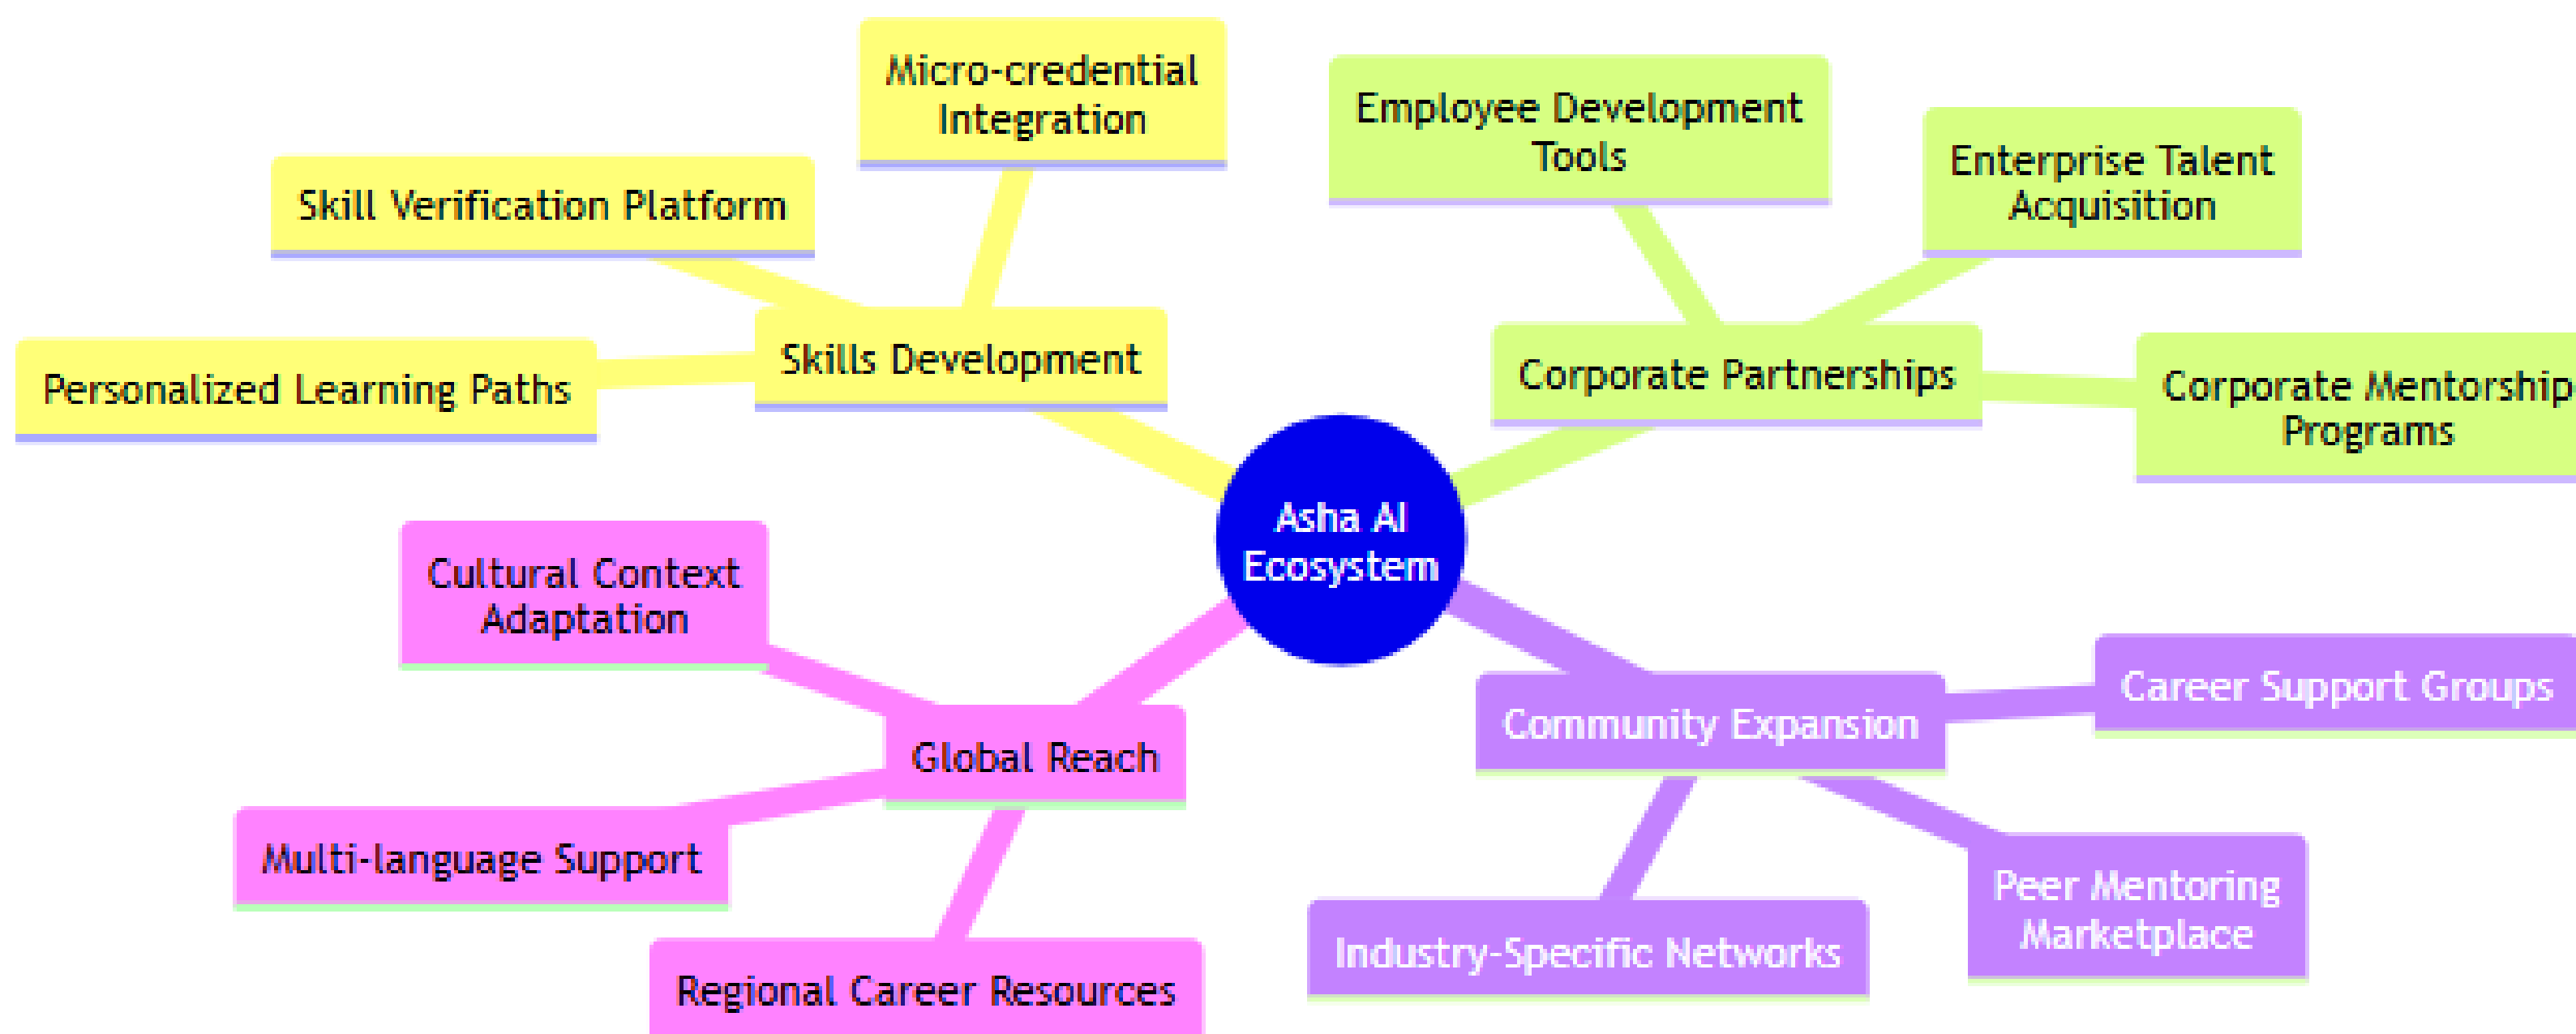

- Unified AI interface delivering contextual responses that are 5x more relevant than generic advice articles, replacing fragmented platforms with 4x more efficient guidance
- Innovative hybrid approach combining AI technology with community connections to expand mentorship access 10x, democratizing career guidance previously available only through expensive coaching
- Dynamic skill mapping and career path visualization, providing 3x clearer professional trajectory visibility with targeted learning resources to address skill gaps
- Scalable architecture with precision job matching (6x better fit), delivering personalized support to thousands of women simultaneously and adapting guidance as career goals evolve

## Opportunities

### USP of the proposed solution

- Career Growth Companion with women-centric design that evolves throughout the professional journey, specifically addressing unique challenges faced by women in their careers.
- Connected Guidance System bridging human expertise with AI accessibility, delivering personalized experiences at scale that would be impossible through traditional coaching.
- Precision-Matched Opportunities using evidence-based career development data to align skills with jobs, learning resources, and growth paths tailored to individual needs.
- AI-powered platform that scales personalization through real-world career progression insights, transforming fragmented career support into an integrated ecosystem for women professionals.

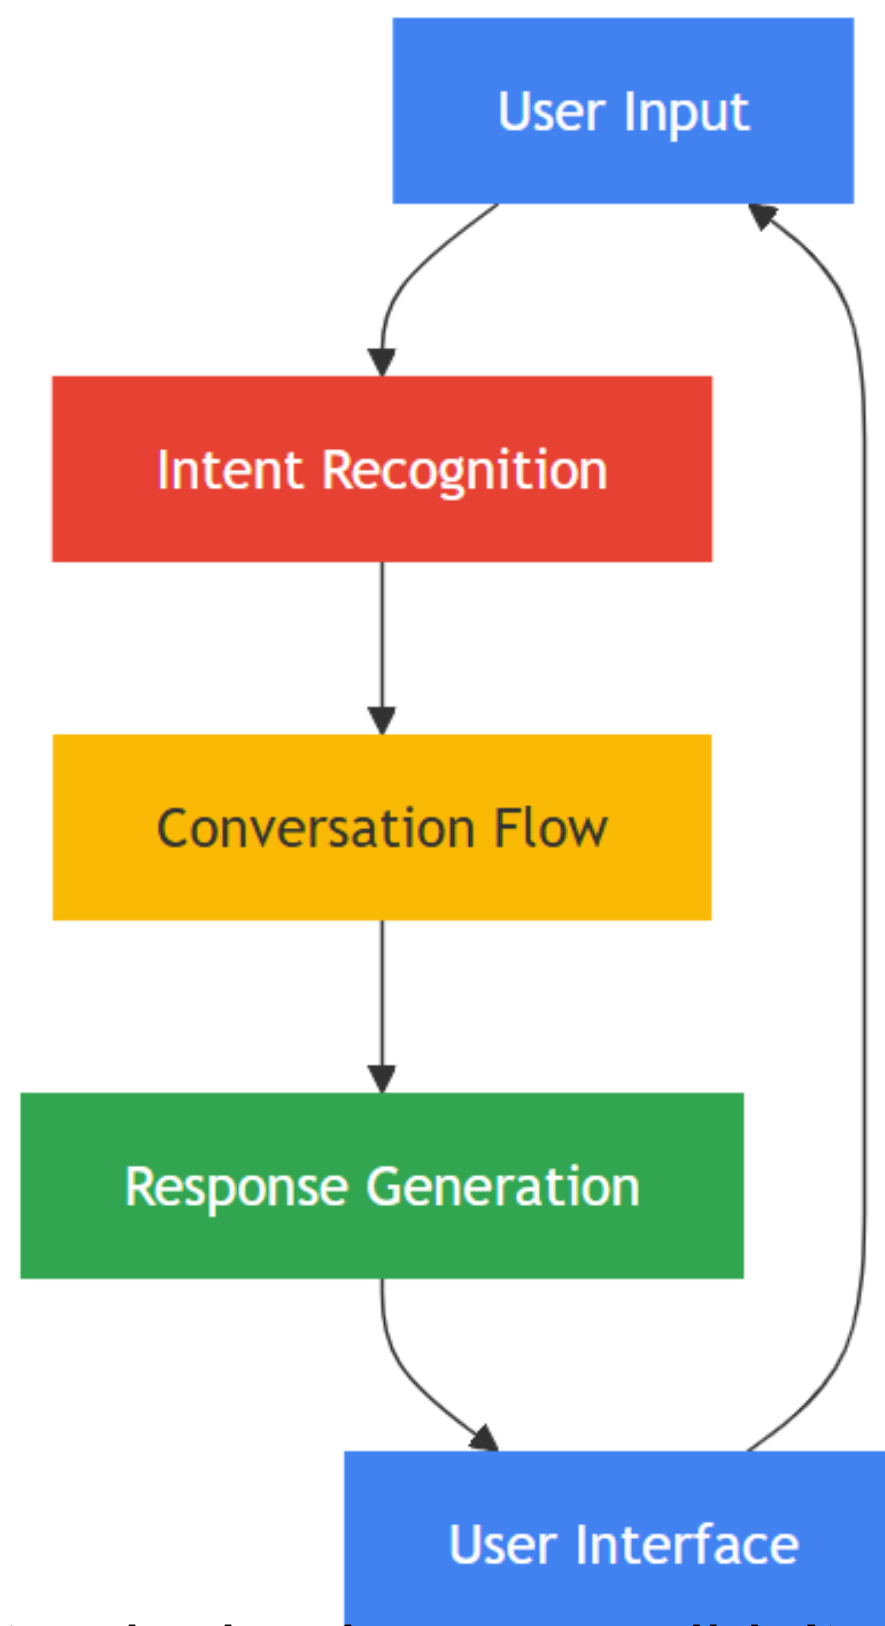

## List of features offered by the solution

*“HerKey Saarthi: The master key that unlocks doors you didn't even know were closed to you.”*

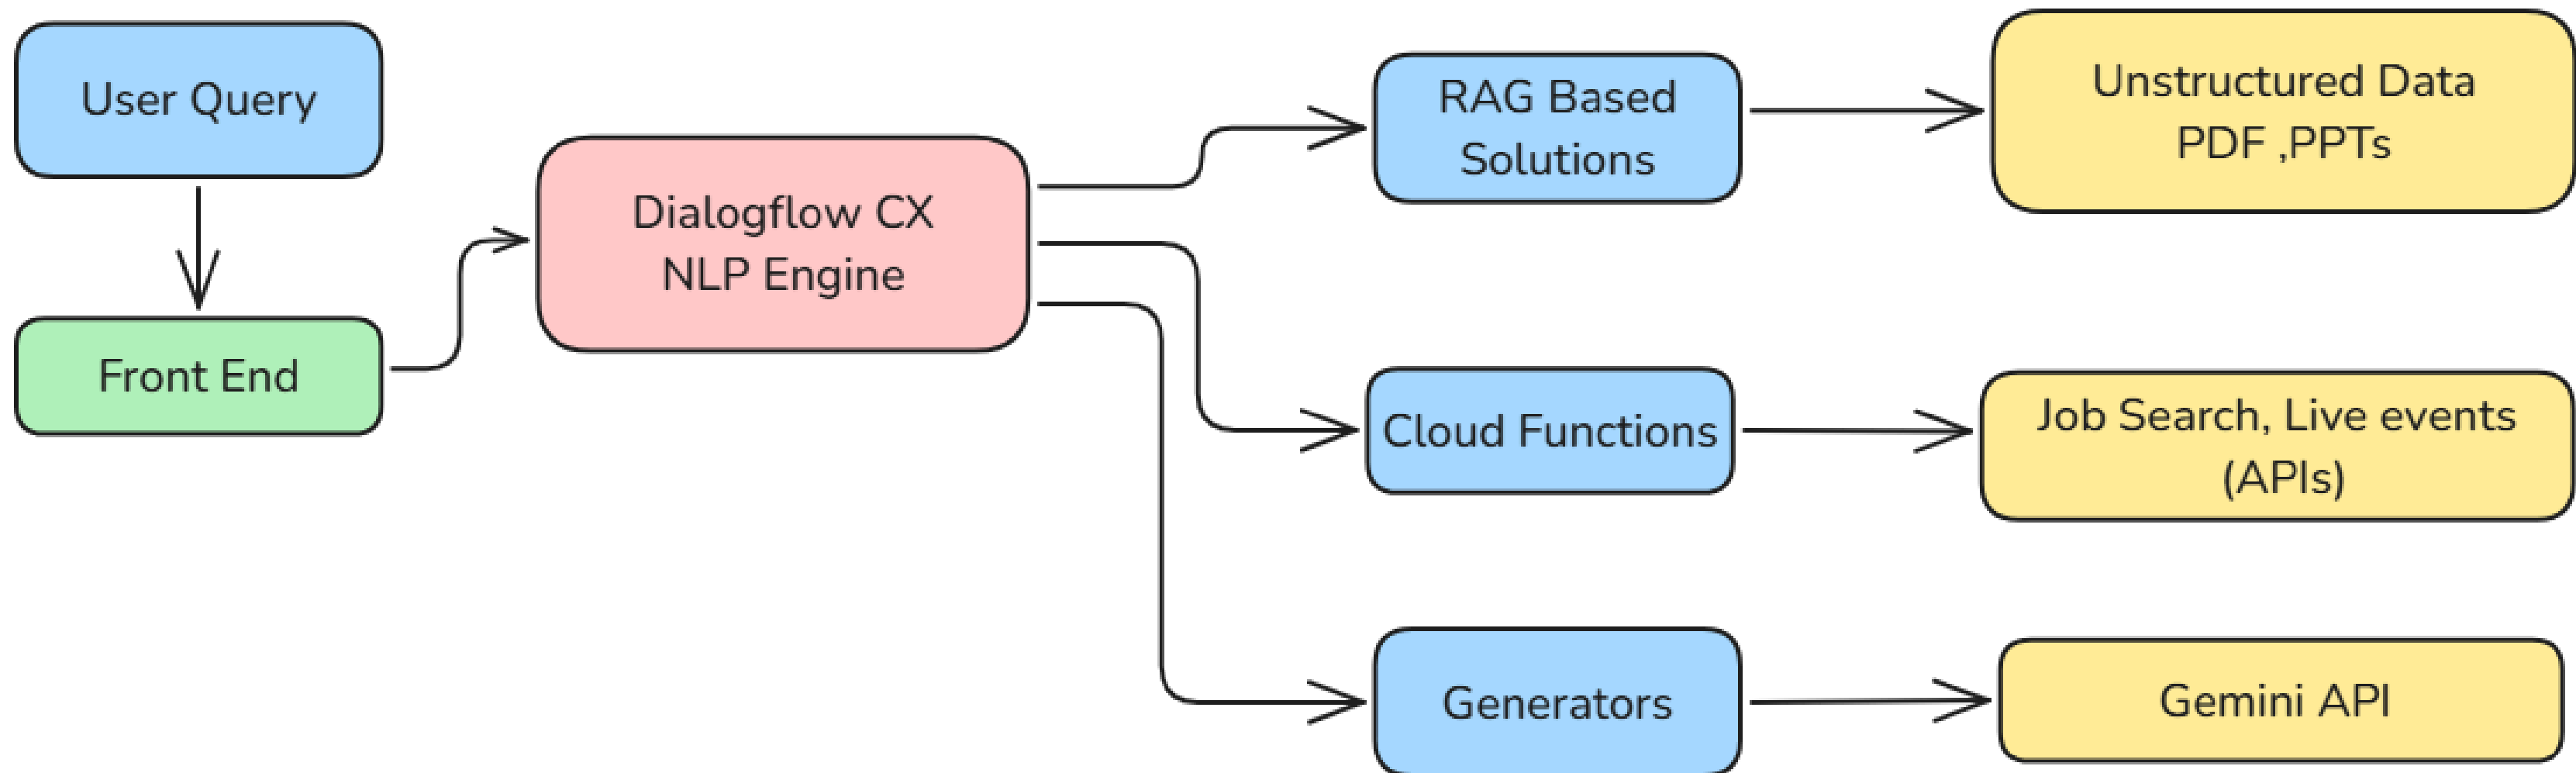

## Process flow diagram

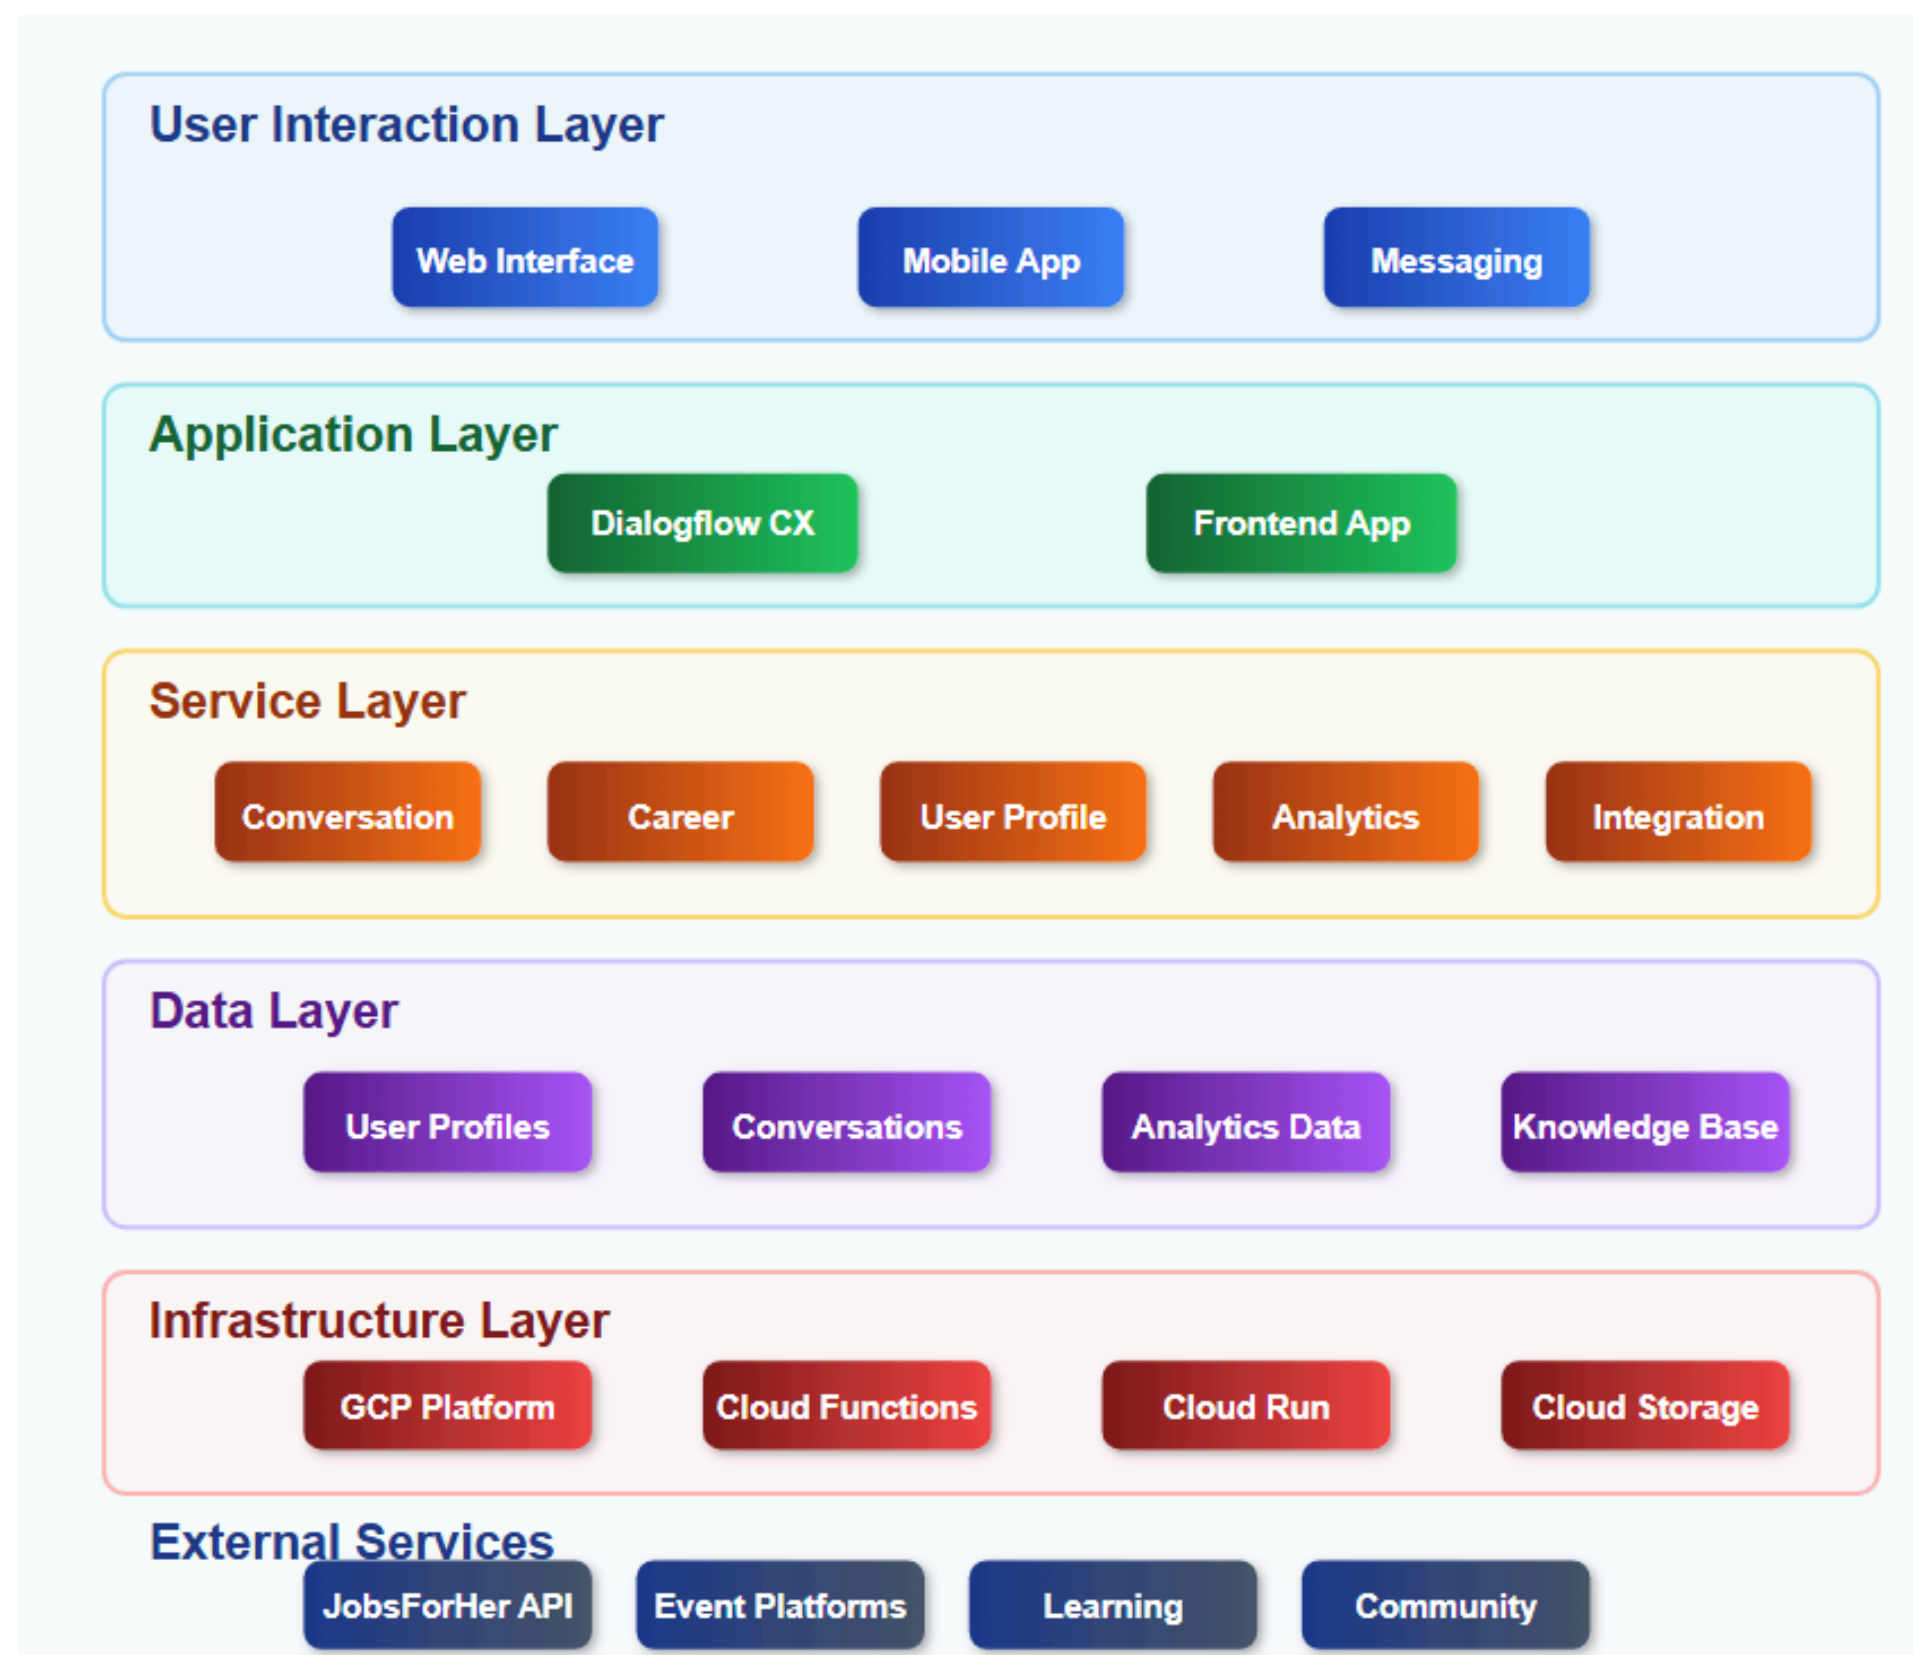

*“HerKey Saarthi: The master key that unlocks doors you didn't even know were closed to you.”*

## Technical Diagram of Conversation AI Solutions

*“HerKey Saarthi: The master key that unlocks doors you didn't even know were closed to you.”*

*“HerKey Saarthi: The master key that unlocks doors you didn't even know were closed to you.”*

## Technologies to be used in the solution

### Conversational AI Technology Stack:

- Google Dialogflow CX for intent recognition, entity extraction, and dialog management
- Custom NLP models for career-specific language understanding
- Context Management System tracking conversation history and user preferences
- Advanced flow management with superior state tracking

### Backend & Cloud Infra Stack:

- Python and Flask for backend development.
- Cloud Functions for serverless compute and webhook endpoints
- Cloud Run for containerized application deployment
- BigQuery for data warehouse and analytics processing storing user profiles
- Cloud Storage for object storage of resources
- Cloud Build for CI/CD pipeline automation

### Frontend Development Tech Stack:

- React.js for web interface component development with component-based architecture
- Material Design Components for consistent UI/UX and accessibility features

### Security & Integration Tech Stack:

- API Gateway as managed API frontend for backend services ,Secret Manager for secure storage of API.
- Webhook Framework handling integration between Dialogflow and external systems
- OAuth 2.0 authentication protocol for secure API access
- Cloud IAM for identity and access management.

Ask something about your career...

*“HerKey Saarthi: The master key that unlocks doors you didn't even know were closed to you.”*

## Prototype Performance Report/Benchmarking

*“HerKey Saarthi: The master key that unlocks doors you didn't even know were closed to you.”*

## Estimated implementation cost (optional)

**Dialogflow CX - Conversation Agent Pricing**

**Cloud Run - Pricing**

**AI Application (Prev Vertex AI Agent Builder) - Pricing**

Dialogflow CX pricing depends on request volume, user count, and features like multi-turn conversations. Cloud Run charges based on request processing, concurrent users, and resource allocation with a free tier. AI Application (formerly Vertex AI Agent Builder) costs vary by request volume, user count, and model complexity.

*“HerKey Saarthi: The master key that unlocks doors you didn't even know were closed to you.”*

## Future Scope: Advanced Agentic Capabilities for HerKey Saarthi

### 1. Intelligent Profile Analysis & Job Matching

- **Multi-Source Analysis:** Extract skills from resume and GitHub repositories
- **Evidence-Based Profiling:** Generate comprehensive skill profiles based on actual work
- **Proactive Job Matching:** Identify positions with 70%+ ATS match score
- **One-Click Applications:** Enable in-chat job applications with pre-populated information
- **Trend Analysis:** Alert users to emerging skills and evolving market demands

## Future Scope: Advanced Agentic Capabilities for HerKey Saarthi

### 2. Personalized Learning Ecosystem

- **Gap Analysis:** Compare profile against market requirements to identify skill needs
- **Multi-Platform Integration:** Aggregate courses from LinkedIn, Coursera, Udemy, YouTube
- **Balanced Development:** Recommend both technical and soft skills training
- **Custom Learning Paths:** Create structured sequences (LMS) rather than isolated courses
- **Interview Preparation:** Provide role-specific practice questions and mock challenges

## Future Scope: Advanced Agentic Capabilities for HerKey Saarthi

### 3. Strategic Mentor Matching System

- **Strength/Weakness Analysis:** Identify development areas through AI pattern recognition
- **Compatibility Matching:** Pair with mentors having complementary experiences
- **Session Facilitation:** Enable scheduling with pre-session questionnaires
- **Guided Interactions:** Generate AI-recommended discussion points
- **Progress Tracking:** Implement accountability framework for measuring outcomes

## Future Scope: Advanced Agentic Capabilities for HerKey Saarthi

### 4. Community & Network Integration

- **Group Recommendations:** Suggest specialized communities matching expertise and goals
- **Event Intelligence:** Surface relevant workshops, webinars and networking opportunities
- **Strategic Connections:** Identify potential collaborators and industry leaders
- **Engagement Support:** Provide templates for introductions and conversation starters
- **Multi-Agent Implementation:** Deploy specialized AI agents for different functional domains

## Technical Documentation:

Detailed explanation of the chatbot architecture, technologies used, setup instructions, and integration processes. (DECK)

Design Document Link :- **Design Document**

## User Guide : Instructions to use the chatbot

User Manual Link :- **User Guide**

## Source Code Repository:

Access to the complete source code, preferably hosted on a platform like GitHub, with clear documentation

Live demo :- Source Repo (only chatbot demo)

Github URL :- Github ID

New Github Code :- Code link (Updated Code)

*Disclaimer : We are adding two different links as we have some deployment and integration issues. All updated code is present in Github.*

*“HerKey Saarthi: The master key that unlocks doors you didn't even know were closed to you.”*

## Demo Video:

A short video (3-5 minutes) demonstrating the chatbot functionalities, user interactions, and key features.
